Opening CD's with every master game ever played for the line and every combination & trap set up on the CD as a training module

Interactive training books on CD

Over 300 opening and ending books plus hundreds more on tactics, grandmasters & more

I use grid displays to hold large numbers of chess books in a small area for your players to browse. This allows the setup to be made in a small area when space is at a premium. It is ideal to have a couple of 8' tables to lay out the chess sets and various small items.

Chess vendors will not usually setup a large display like this at smaller tournaments but I specialize in doing smaller ones. I usually provide free CD's as upset prizes for the Tournament Directors, Chess Coaches & players to benefit from my being there. This adds more to the event than just having a great chess store brought to them.

If you would like me to setup at your larger tournaments, please call me to line up the dates in advance. I work out of Nebraska covering the Rockies to the Mississippi. I also have worked tournaments from Philadelphia to Tacoma, Washington. When I travel that far I try to line up several in adjoining states. Tournaments with at least 100+ players work best but in slower or more convenient weekends I have setup for as few as 50 players. You can contact me at- 402-564-5864 (If I am on the road you can leave a message with my folks)

E-book Copyright by Tim Tobiasson 2002

About “Tactical Chess Openings”

*Each CD covers a particular opening or variation.

*The database on the CD contains virtually every game using this line played by masters in major tournaments since the 1800's to 2000.

*There is a complete tactical analysis of the most or all of the games on the CD by “Doctor”. The annotations appear with all games called up in the Doctor analysis folder

*All the combinations and opening traps are in the file called “Mate” and come up as training modules when the Fritz, etc., or Chessbase GUI is used. The entire database is prepared in this file with the training modules which give you five minutes to find the correct move and grades you accordingly (by speed and accuracy)

*A ready to print book with all the analyzed games and a “History” of the opening (complements of the Chessbase program) is on the CD in the word processor format and also in Adobe Acrobat (PDF) format. The Acrobat reader is on the CD as well

The analyzed games are produced in “Full analysis mode” by a Chessbase GUI program such as Fritz. It is an award winning program used to annotate games (including yours) at a Grandmaster level. This CD is the product of over 30 days of computer time and considerable human labor to convert to a print ready book. We hope you have many happy hours with it and play better chess as a result of the greater opening knowledge it provides!

How to Use This CD

Using Fritz & related GUI's

1. Start Fritz or other Chessbase program.
2. Click on "File", "Open"- "Database" (F12) (This takes you to the database screen which is empty the first time you use it.)
3. From this screen, click on file-open database to open a new database (Ctrl O)
4. In the select window that just appeared, go to the CD Drive and select the games you wish to view first. Select the CBH version for all Fritz features
5. You will now see a list of games to pick from. You may select the first game and then press F10 to load the next game on the list. The game and all annotations appear on the Fritz interface for you to play & review, complete with all analysis. If you select a game with a red and/or black color icon, it contains a training module that gives you 5 minutes to find the best move. The ... which appears before the move indicates the move before the training module appears.

Using other chess programs

Most other chess programs will read the same games as the PGN file type which also appears in each folder. The annotations will also appear if program is set up to read them. Just click on the PGN file and select the game you wish to review. The training modules only work with a chessbase interface (CBH) and will not work with other programs.

To use as a read only book or Print on Demand

Each CD contains the same games as a ready to print book in the format of the word processor that is used, then converted to Acrobat files (PDF) which can be read directly & printed on demand.

The Acrobat Reader is on the CD and can be set up by going to the CD and clicking on the file "setup acrobat reader".

The book can also be printed for you as book in comb binding at a reasonable rate by

Chess World Champions #1

Phildor, Staunton, & Morphy

PAUL MORPHY, THE CHESS CHAMPION.

*The Worlds first “unofficial” World
Champions. A collection of their games,
books, history, Chess articles, archives &
much more!!*

About “World Champion CD #1”

*This CD covers the history of the World Champions Philidor, Staunton & the United States favorite son “Paul Morphy” who was the first Bobby Fischer. These were the greats who generated the early interest in Chess and whose fame helped make Chess the most popular game on earth.

This CD contains virtually every game played by These great masters in 1700’a and 1800’s.

*There is a complete tactical analysis of the most or all of the games on the CD by “Fritz”. The annotations appear with all games in database files you can read with Fritz or other Chess Computer Engines so you can play through them in an interactive Mode.

*All the combinations and opening traps are also incorporated into the Fritz files as training modules so you can see if you can find the same combinations in each game that they did

All the games are also on this CD as ready to print Books in PDF format (which uses acrobat reader Which is included on this CD). You can read and Print these books. The CD also includes the books-

*Morphy, Staunton & Chess in the 1800’s

*Morphy’s Games of Chess

*Paul Morphy & The Golden Age of Chess

*Staunton_Misc. Collection

The Games of Philidor

The Games of Morphy

The Games of Staunton

Chess World Champions #2

William Steinitz

WILLIAM STEINITZ

*The Worlds first “Official” World
Champion. A collection of his games,
books, history, Chess articles, archives &
much more!!*

About “World Champion CD #2”

*This CD covers the history of the first official World Champion William Steinitz who was born on May 14th 1836. He would win the World title in July 1866 at the age of 30 and retain it for 28 years when he finally gave in to the youth and genius of Dr. Emanuel Lasker. He was the first to write about holes or “weak squares” and how to take advantage of them. He also pioneered the “accumulation of small advantages”.

This CD contains virtually every game played by this great master through the 1800’s to his death in June 22, 1900.

*There is a complete tactical analysis of the most or all of the games on the CD by “Fritz”. The annotations appear with all games in database files you can read with Fritz or other Chess Computer Engines so you can play through them in an interactive Mode.

*All the combinations and opening traps are also incorporated into the Fritz files as training modules so you can see if you can find the same combinations in each game that they did

All the games are also on this CD as ready to print Books in PDF format (which uses acrobat reader Which is included on this CD). You can read and Print these books. The CD also includes the books-

- *A Memorial to William Steinitz
- *The Modern Chess Instructor
- *The Games of William Steinitz
- *Articles from Chess Reviews
- *Excerpt from Chess in the 19th Century

Chess World Champion #3

Dr. Emanuel Lasker

The Great Dr. Lasker, World Champion from 1894-1921. He published Laskers Chess magazine from 1902-1907 while living in New York and conducted a chess column for the evening post. He held the title of World Champion for an amazing 27 straight years. He also published serious papers on Philosophy which were taught in European Universities. He authored several popular chess books (included in this CD) and left a remarkable legacy of planning, logic and an indomitable will to win (He never lost a match in his life until his match with Capablanca in 1921 at age 53)

About “World Champion CD #3”

*This CD covers the history of the 2nd official World Champion Dr. Emanuel Lasker who was born on Dec 24th 1868 in Germany. He would win the World title in May 1894 at the age of 26 and retain it until 1921 when he finally gave in to the youth and genius of Jose Capablanca at age 53. Lasker would not lose a single match in his entire life until relinquishing the title in 1921.

This CD contains virtually every game played by this great master through the late 1800's to his death on Jan 11th, 1941.

*There is a complete tactical analysis of most or all of the games on the CD by “Fritz”. The annotations appear with all games in database files you can read with Fritz or other Chess Computer Engines so you can play through them in an interactive Mode.

*All the combinations and opening traps are also incorporated into the Fritz files as training modules so you can see if you can find the same combinations in each game that Lasker did

All the games are also on this CD as ready to print Books in PDF format (which uses acrobat reader Which is included on this CD). You can read and Print these books. The CD also includes the books-

- *A collection of Chess Review Articles on Dr. Lasker
- *The St. Petersburg Masters Chess Tournament
- *Common Sense in Chess (Lasker)
- *Laskers Manual of Chess
- *Laskers Chess Primer
- *The Games of Lasker

Chess World Champion #4

Jose Raoul Capablanca

The Incomparable Jose Raoul Capablanca, World Champion from 1921-1927 was a child prodigy winning the Cuban chess championship at age 12. He studied the endgame exhaustively & played thousands of skittles games for money while developing his skills and attending college in New York. During the 1920's he was described as "unbeatable" and a chess "machine". From 1916-1924 he did not lose a single game of master level chess play, a feat that has never been equaled before or since. From 1911-1931 he never finished lower than 3rd in any tournament he played in. Here, on this CD is every master level game ever played by this genius with several of his books plus articles from Chess Review on his games and his life.

About “World Champion CD #4”

*This CD covers the history of the 3rd official World Champion Jose Raoul Capablanca who was born in Havana Cuba on Nov 19th 1888. He would win the World title in 1921 at the age of 33 and retain it until 1927 when he was upset by a new superstar of chess, Alexander Alekhine. He was denied a re-match for the rest of his life. From 1916-1924 he would not lose a single game of master level chess, still the longest streak in history

This CD contains virtually every game played by this great master through the early 1900's to his death in New York on March 8th, 1942.

*There is a complete tactical analysis of most or all of the games on the CD by “Fritz”. The annotations appear with all games in database files you can read with Fritz or other Chess Computer Engines so you can play through them in an interactive Mode.

*All the combinations and opening traps are also incorporated into the Fritz files as training modules so you can see if you can find the same combinations in each game that Capablanca did

All the games are also on this CD as ready to print Books in PDF format (which uses acrobat reader Which is included on this CD). You can read and Print these books. The CD also includes the books-

*Chess Fundamentals

*A Primer of Chess

*The Games of Capablanca

*Chess Review Articles Collection

Chess World Champion #5

Alexander Alekhine

Alexander Alekhine, is considered by many to be the greatest Chess master in the history of the game. He became World Champion in 1927-1935, losing it to Max Euwe then regaining it in 1937 and holding the title until his death in 1946.

He was considered to be the first to practice using “psychology” to give him an edge over his opponents and credited this to his amazing victory over the unbeatable Capablanca for the world title in 1927. This CD contains both volumes of his annotated best games as well as a collection of Chess Review articles from his championship days giving new historical insight into his achievements. Over 2000 of Alekhine's games are included in a complete collection fully analyzed and annotated by Fritz.

About “World Champion CD #5”

*This CD covers the history of the 4th official World Champion Alexander Alekhine. He was born in Moscow on Nov 1st 1892. He would win the World title in 1927 at the age of 35 and retain it until 1935 when he was upset by Max Euwe. In a return match in 1937 he would regain the title and hold it until his death in 1946. The controversy over articles he had written during World War 2 while his wife was held by the Nazi's tarnished his great reputation and haunted him for the rest of his life.

This CD contains virtually every game played by this great master through the early 1900's to his death in New York on March 24th, 1946. Over 2000 games are included.

*There is a complete tactical analysis of most or all of the games on the CD by “Fritz”. The annotations appear with all games in database files you can read with Fritz or other Chess Computer Engines so you can play through them in an interactive Mode.

*All the combinations and opening traps are also incorporated into the Fritz files as training modules so you can see if you can find the same combinations in each game that Alekhine did

All the games are also on this CD as ready to print Books in PDF format (which uses acrobat reader Which is included on this CD). You can read and Print these books. The CD also includes the books-

*My Best Games of Chess (Alekhine) V1 & V2

*The Unknown Alekhine

***Hundreds of Chess Books including many classics
*Every Chess Review from 1933-1949 (app 200 issues)
*The 1st 5 World Champion CD's (fully interactive)
*Over \$5,000 worth of books if you tried to buy them
today are on this DVD. Now you can own the
greatest chess library ever assembled in one place!**

**If you ever wanted to own the great Grandmaster
Chess library but couldn't afford it, here it is.
Every book can be read directly using adobe acrobat
reader (which is on the DVD). You can also print out
every book from acrobat including the interactive ones.
The World Champion CD's have training modules for
virtually every game played by the champions. These
modules use Chessbase-Fritz GUI's to run them. Can you
find the best move the champions did? You have 5 minutes
to find the move and are graded in each training module.
The 5 Champion CD's have over 4,000 training modules.**

The Ultimate Chess DVD

This is a collection of the following Chess CD's

Chess #1- A Sampler of Chess books. 12 massive volumes including Rubinsteins Chess Masterpieces, Stauntons immortal Chess Players Handbook.

Chess #2- Chess Reviews, every issue 1933-1940

Chess #3- A bit of everything in chess. 20 volumes including 6 problem books, 2 strategy, opening, tournament and ending books plus six all time classics.

Chess #5- Traps mates combinations & problems. 13 volumes of problems & mates, four on tactics science and three on opening traps.

Chess #7- Chess Reviews 1941-1943 with all pictures

Chess #8- Chess Reviews 1944-1946 with all pictures

Chess #9- Chess Reviews 1947-1949 with all pictures

World Champion #1- The early "unofficial World Champions covers Philidor, Staunton and the first "Bobby Fischer" of the United States, Paul Morphy. all the games are CBH files with training modules in almost every one (for use with Chessbase/Fritz). The games are also available as PGN for other chess programs and as PDF ready to print books. Each game is fully analyzed by Fritz for improvements.

World Champion #2- William Steinitz the worlds first official world champion. Almost 1,000 games in all three file types as #1.

World Champion #3- Emanuel Lasker, the second World champion for 27 years. Almost 1,000 games.

World Champion #4- Jose Capablanca, champion from 1921-1927 and unbeaten for eight straight years.

World Champion #5- Alexander Alekhine, champion from 1927-1946. Over 2,100 games.
